

About our EDI Solutions

our #1 priority is You ...

...See how EasyLink's EDI Solutions help you transact easily with your trading partners

If your focus is to improve supply chain operations through an interconnected business model where you are enabled to comply, coordinate and collaborate within your trading communities, then you should look to EasyLink for innovative e-commerce solutions.

At EasyLink, we understand that in today's ever-changing global economy, one of the most essential business needs is for electronic communication with one's trading partners -- rapidly, securely, and accurately -- in order to facilitate critical business transactions and employ streamlined supply chain operations. That's why our emphasis on providing superior technology, solutions and support that address evolving market needs and industry standards cannot be overstated. Our goal is to help you maximize your investment in solutions that connect you to your trading partners and enable electronic communications outside your four walls.

For thousands of customers in a variety of sizes, organizational structures, industries and levels of technical sophistication, we have revolutionized the way in which they conduct business electronically with their trading partners. And we accommodate changes to existing processes and new operational needs as their businesses evolve.

With our broad array of offerings, we have the right solutions to ensure the security, stability, reliability, and functionality needed to automate your transaction workflows – all vital elements for helping you offer unsurpassed service, respond to compliance standards, and master new ways of conducting business.

The EasyLink Advantage

- Superior customer support
 - Value-added functionality
 - In-depth industry expertise
 - Unmatched migration paths
-

Our strength becomes your strength.

Rely on us.

About our EDI Solutions

With EasyLink as your partner, you can move forward with confidence, knowing that our breadth of offerings provides a path for migration as your business evolves and changes.

Our array of products and services offers functionality and scalability to enable trading partners of different sizes with unique business models, diverse company infrastructures, and various levels of technical sophistication to transport, route and deliver information seamlessly, reliably, and securely, regardless of protocol or format.

- **EasyLink VAN Service** is a complete value added network (VAN) solution that meets electronic data interchange (EDI) and e-commerce requirements in a secure, reliable, available and flexible environment – all at an affordable price - to move information seamlessly and efficiently, and to expedite transaction processing regardless of file size, communication protocol, or data format.

- **EasyLink Software** is designed to enable the management and exchange of vital information between trading partners and address a full range of requirements for effective operations. The application operates on Microsoft Windows computing platforms, features “plug-and-play” installation and integrates easily to existing processes. Our software, *Performance EDI*, includes data translation, order processing, and retail product management.

- **EasyLink Web-based Applications** offer an alternative to managing an in-house operation. With the use of a Web browser, the technology required to participate in EDI and global data synchronization (GDS) is easily acquired. Web-based Applications include *TradeGateway* for EDI and *Rapid-Data-Sync* for GDS.

- **EasyLink Managed Services** utilize our team of professionals to manage the systems and processes for data transport and transformation. Our Managed Services include:

E-Commerce Outsourcing: We leverage our extensive experience in the industry, knowledge of industry trends and directions, and understanding of trading partner requirements to manage EDI operational environments and transaction workflows as well as EDI strategic projects, from concept through solution delivery.

E-Commerce (EC) Service Center: Our professionals serve as an extension to organizations by performing activities that enable compliance to trading partner mandates. Those activities include EDI-to-Fax/Email, Fax/Email-to-EDI, label/tag/sticker generating and printing, and U.P.C. Catalog updating.

Trading Partner Enablement and Management: We utilize our resources, experiences, and offerings to manage the complex tasks and various requirements associated with integrating trading partners into a trading community.

- **EasyLink Professional and Consulting Services** utilize our team of experts to assist with all phases of an e-commerce business-to-business initiative, including the planning, analyzing, designing, constructing and implementing of the solution.

Mapping: Our technical experts provide EDI data mapping services in a wide-variety of tools to enable the translation between different data formats.
