

Value Added Network Services

Optimize coordination, compliance and collaboration with trading partners...

....See today how EasyLink facilitates your transactions

EasyLink knows that trading partner collaboration is critical to a networked business model. Our goal is to help your organization extend beyond its four walls for a competitive and cost effective supply chain operation. By providing all the functionality inherent in the EasyLink value added network, we help you maximize your investment in the network services that connect you to your trading partners and facilitate your transactions.

Our emphasis on providing world-class services cannot be overstated. That's why we focus on providing innovative services that set standards within the industry and ensuring you operate your EDI environment with enhanced productivity and improved economics.

Key Benefits of EasyLink

- Improve processing time through real-time, high-speed connections, faster than traditional VANs.
- Ensure business continuity with auto archiving and tested disaster recovery plans, and multiple communication paths.
- Increase staff efficiency with control over your operations through real-time alerts and reports, and document flow management.
- Maximize integration outside your four walls by facilitating transactions of any file type and size in any format.

Unrivaled Service with EasyLink
